Tips to help your jewellery have a lustrous life!

* **Remove** all of your jewellery before going in a hot tub or swimming pool. The harsh chemicals may strip metal plated chains and even can dull silver or gold, and can strip many finishes on beads.

* Put your jewellery on **after** you put your makeup, hairspray and perfume.

* **Showering** with jewellery can also damage jewellery that is plated as well as providing wear and tear to beading wire, elastic and the overall fabrication of the piece. It can also dull the finish on silver and gold. Never wear your pearls in the shower.

* **Hanging** your jewellery is a great display idea, but if the piece is strung on beading wire, especially with heavy beads, it may cause the piece to stretch and break.

* It's always a good idea to **store** your jewellery in a jewellery box wrapped in a jewellery cloth or in a zip lock bag to prevent oxidization.
